1. Executive Summary

The Indonesian government separated the previous C5 "Media and Press" visa into two distinct indexes in June 2025: the legacy **C5 Visa Media dan Pers** (reserved for credentialed journalists requiring Ministry approval) and the new **C5A Visa Kunjungan Konten Kreator**, designed for digital content creators (YouTubers, Instagram and TikTok producers, podcasters) whose income originates outside Indonesia.

Eleven months after the index entered the legal framework, the operational surface remains incomplete. The official Imigrasi page for C5A still shows **Data Belum Tersedia** (Data Not Yet Available), and the international press has covered the broader Dharma Dewata enforcement operation without consistently signalling that the regulatory category for legitimate creator activity already exists.

This dossier captures the legal facts that **can** be cited verbatim, flags every claim that remains unverified, and translates the findings into a structured set of compliance and advisory services that Bali Zero can offer to creators currently in Bali on tourist or other transitional visa indexes.

Verified anchors (this revision): PNP base fee IDR 1,000,000 for any 60-day Visa Kunjungan single-entry, per PP 45/2024 Annex; extension pattern 60+60+60 = 180 days confirmed; no automatic conversion from C5 to C5A (existing C5 holders continue under transitional rule of Permenkumham 11/2024, Article II §1(c)).

2. Visa Code Disambiguation

The C-prefix in Indonesian immigration nomenclature designates the visa category as a **Visa Kunjungan** (Visit Visa) — a non-residence authorisation for activities not requiring a KITAS (Limited Stay Permit) such as E33G (Digital Nomad).

INDEX	NAME	DURATION	SOURCE AUTHORITY	PRIMARY USE CASE
C1	Visa Kunjungan Wisata	30 / 60 / 180 days	Permenkumham 22/2023	Tourism
C2	Visa Kunjungan Bisnis	60 days	Permenkumham 22/2023	Business meetings, no employment
C5 (legacy)	Visa Media dan Pers	60 days (extendable to 180)	Permenkumham 22/2023 (pre-Kepmen M.IP-08.GR.01.01/2025)	Credentialed journalism, Ministry-approved coverage
C5A	Visa Kunjungan Konten Kreator	60 days (extendable to 180)	Kepmen M.IP-08.GR.01.01/2025 (June 2025)	Independent content creator activity
C7C	Talent and Arts	30 days non-extendable	Permenkumham 22/2023	Industrial film/TV production, requires Kemkominfo permit
C9	Visa Kunjungan Pendidikan	60 days	Permenkumham 22/2023	Short-term study, no employment
E33G	KITAS Digital Nomad	1 year (renewable)	PP 40/2023 + Permenkumham 11/2024	Remote worker with foreign employer, USD 60,000+/year

The discriminator between C5 and C5A is the **institutional guarantor** requirement: C5 demands a press card and a sponsorship letter from a Ministry; C5A requires only proof of independent creator status (social media portfolio) and proof of foreign income of at least USD 2,000 per month.

3. Genesis and Regulatory Timeline

The regulatory stack underpinning C5A is layered as follows, from most general to most specific:

1. **UU 6/2011** on Immigration (as amended by UU 63/2024) — primary law defining the categories of visa, residence permits, and enforcement powers. UU 63/2024 introduces the automatic integration of the Multiple Exit Re-entry Permit (MERP) into KITAS/KITAP.
2. **Permenkumham 22/2023** — the foundational visa-index regulation establishing the 110-index taxonomy currently in force, including indexes E33G and the original C-prefix system.

3. **Permenkumham 11/2024** — operational procedures for visa application via the **aplikasi** (eVisa portal) and transitional provisions (Article II §1(c) on previously issued visas).
4. **PP 45/2024** — government regulation on non-tax state revenue (PNBP), including the verbatim tariff schedule for visit-visa categories (Annex A.II).
5. **Kepmen M.IP-08.GR.01.01 Year 2025** — Decision of the Minister of Immigration and Penitentiary Affairs reclassifying the visa index system, separating C5 into journalism (C5) and content-creator (C5A) sub-indexes. *Note: this document was ingested into NB-2 on 2026-05-26.*

Operational status as of 26 May 2026: the official Imigrasi portal (imigrasi.go.id/wna/daftar-visa-indonesia/C5A) displays the title "C5A Visa Kunjungan Konten Kreator" but the substantive fields (requirements, fees, duration, documents) return **Data Belum Tersedia** . Empirical verification of this state was performed via curl on 2026-05-26.

4. Facts Layer

Each entry below is a fact that can be cited verbatim; speculative inferences are flagged separately in subsequent sections.

DATE	FACT	SOURCE
13 Aug 2025	Promulgation of Kepmen M.IP-08.GR.01.01/2025 on Visa Classification	Kepmen document (NB-2 source 0c7e2212, ingested 2026-05-26)
15 Apr 2026	Launch of the Dharma Dewata Task Force in Bali, Renon Field Denpasar	Press release Kanwil Ditjen Imigrasi Bali
Apr 15 – May 04 2026	165 deportations, 62 detentions during the first 21 days of the operation	Press release Imigrasi Ngurah Rai, 11 May 2026
11 May 2026	"Imigrasi Bali Amankan 62 WNA Bermasalah pada Patroli Dharma Dewata"	ngurahrai.imigrasi.go.id (NB-2 source 8ea5fae9)
26 May 2026	C5A page status verified: "Data Belum Tersedia"	Live curl on imigrasi.go.id/wna/daftar-visa-indonesia/C5A

The Dharma Dewata operation deliberately targets the categories of foreign nationals whose activity in Bali is most often classified as **bekerja di Indonesia** (working in Indonesia) under tourist-visa indexes: influencers, yoga teachers, DJs, photographers, fitness trainers. The category to which a legitimate content creator should now be applying — C5A — has been operationally inactive on the official portal for the entire window during which the enforcement is occurring.

5. Stakeholder Positions

(a) Government of Indonesia

The Ministry of Immigration and Penitentiary Affairs has positioned the 2025 reform of the visa index system as a modernisation effort — reducing 133 indexes to 110, separating overlapping categories, and aligning the visa framework with the OSS-RBA business licensing system. Public communication has emphasised C7C (Investor Briefing) as the headline new index; C5A has received comparatively little operational publicity.

(b) Indonesian legal industry

Boutique law firms (visapro, Christian Teo, ILA) and major chambers publish overview articles on the 110-index reform but routinely defer C5A operational details to "contact for quote" — consistent with the official portal gap.

(c) International press

The Jakarta Post, Bali Times, Travel and Tour World, Outlook Traveller, and ivisa.com cover the Dharma Dewata enforcement extensively, framing the underlying issue as the boundary between tourist activity and "illegal work." The C5A index as a compliant alternative is rarely surfaced in international coverage.

(d) Foreign chambers

AmCham, BritCham, EuroCham, IBC publish member advisories on the Dharma Dewata operation but, as of the date of this dossier, none have issued specific guidance on C5A.

(e) Influencer commentators

YouTube and Substack commentary by foreign creators in Bali centres on "which visa do I need" without consistent reference to the C5A index code. This is a signal that even the audience most directly served by the new index has limited awareness of its existence.

(f) Local Indonesian voices

Discussion on Indonesian-language platforms (Kompas, Detik, Tempo, local Bali outlets) treats the enforcement as a sovereignty/order narrative rather than a regulatory-clarity narrative, with limited operational coverage of C5A.

6. Public Discourse Layer

This section captures the buzz and informal commentary observable on Reddit, Instagram, TikTok, Telegram, and tabloid coverage. All entries are labelled **unverified** — they reflect public discourse, not ground-truth facts.

Reddit (r/bali, r/indonesia, r/expats)

Threads from January through May 2026 cluster around two themes: "is barter payment for accommodation considered work" and "which visa should I be on if I'm posting paid content from Bali". The C5A index code itself is rarely mentioned; the discussion remains second-level ("should I worry / which visa do I need").

Instagram, TikTok, Telegram

Hashtags #DharmaDewata, #BaliVisa, #BaliCrackdown have measurable activity. No identified Indonesian or English-language hashtag for the C5A code has obtained meaningful traction. Telegram channels Bali Insider and Bali Visa Updates discuss the enforcement broadly without referencing the C5A alternative.

Tabloid and viral cases

Viral cases involving foreign nationals (the "Receh" episode, the Bonnie Blue "BANGBUS" coverage) drive attention to the deportation outcome rather than to compliance pathways. Bali Zero advisory communication during Step 2 should avoid pivoting on these cases, which lack regulatory continuity.

Discourse note: the digital community is uniformly second-order with respect to C5A — discussion is about anxiety and triage, not about the index code itself. This represents a knowledge advantage window for Bali Zero, to be used through accurate fact-based communication rather than competitive positioning.

7. Historical Reconstruction

The reform narrative can be reconstructed as follows. In 2011, Indonesia enacts UU 6/2011, the foundational immigration law. The visa-index system in subsequent years grows to 133 indexes, with overlaps and ambiguities between business, journalism, investor, and worker categories. In 2023, Permenkumham 22/2023 consolidates the system into a more rationalised framework, introducing indexes such as E33G (Digital Nomad) but maintaining a single C5 index for both formal journalism and "content creator" activity. The result is operational friction: formal journalism requires Ministry-level approval, but the same category was being used for informal content creators with no clear regulatory pathway.

In June 2025, Kepmen M.IP-08.GR.01.01 separates C5 into two indexes: C5 (journalism, Ministry-approved) and C5A (independent content creator, self-evidenced). The press release of 13 June 2025 emphasises the broader re-

duction from 133 to 110 indexes, with C7C (Investor Briefing) treated as the headline. C5A enters the legal corpus but remains operationally dormant: the official portal page exists with the title but the substantive fields are not populated. The apparatus is legally ready; the operational apparatus is still in calibration.

UU 63/2024 amends UU 6/2011 to integrate MERP into KITAS/KITAP and align with OSS-RBA. The amendment does not directly modify the C5A specification but reinforces the modernisation context.

As of 26 May 2026, the situation is the following: regulatory legitimacy is established; operational data on the official portal is missing; the Dharma Dewata enforcement is active and high-profile; press coverage emphasises the enforcement angle without consistently surfacing the C5A alternative. Bali Zero has a knowledge-advantage window in which to position itself, provided it does so on the basis of verified facts and not on speculative claims.

8. Reality vs Letter of Law

Letter of the law

C5A is a legitimate visa category for independent content creators:

1. 60 days initial duration, extendable to 180 days total (60+60+60).
2. No requirement for an Indonesian corporate sponsor.
3. Proof of independent creator status (social media portfolio).
4. Proof of foreign income of at least USD 2,000 per month.
5. Income source must be foreign (Google Ireland/US for AdSense, ByteDance for TikTok); content must not violate Indonesian norms.

Enforcement reality (Dharma Dewata 2026)

The Dharma Dewata Task Force operates with a wide enforcement remit. As of 11 May 2026, 165 deportations and 62 detentions have been recorded during the first 21 days of the operation, with explicit targeting of "influencer, yoga teacher, DJ, fotografi" categories. The enforcement acts primarily against:

- foreign nationals on B1/B2/C1 tourist indexes engaged in monetised activity from Indonesia;
- holders of any visa index conducting brand collaboration with Indonesian companies;
- any visible commercial activity (paid promotions, sponsored events, endorsements involving local entities).

Friction cases April–May 2026

Public reporting between April and May 2026 includes deportations of content creators for "promoting paid content from Bali", indictments for "working for Indonesian companies without a work permit", and several informal warnings about barter arrangements with local hotels and villas in exchange for promotional content. The

regulatory boundary between "legitimate C5A activity" (foreign-origin monetisation) and "illegal work" (Indonesian-origin compensation, including in-kind) remains the live question on which Bali Zero advisory should focus.

9. Bali Zero Solutions Menu

The following seven service components translate the dossier findings into structured advisory offerings. Pricing references the verified PP 45/2024 PNBP schedule where applicable; agency components are estimates to be finalised after the first pilot cycle.

Service 1 — Visa Diagnostics Consultation

One-hour structured triage session producing a decision tree across C5A, E33G, C1-plus-exit, and KITAS PT PMA pathways. Deliverable: a one-page recommendation and risk matrix. Fee: IDR 1.5–2.5 million.

Service 2 — C5A Single Application (60 days initial) — verified pricing

Government PNBP, verified against PP 45/2024 Annex A.II.1.d:

- Visa Kunjungan single-entry 60 days: **IDR 1,000,000 per person**
- Visa Kunjungan multi-entry 60 days: IDR 1,500,000 per person (alternative if multiple Bali entries expected)
- PP 45/2024 does **not** differentiate by index code in the base tariff; C2, C5, C5A, C7, C9 at 60 days all pay the same IDR 1,000,000.
- **UNVERIFIED** Any C5A-specific surcharge requires confirmation by direct Kantor Imigrasi inquiry.

Bali Zero agency component (estimate): pre-application document audit, social media portfolio dossier, income proof verification (IDR 4–7 million); submission and Kantor liaison (IDR 2–3 million); optional sponsor structuring with Bali Zero PT as Penjamin (IDR 1–2 million setup + IDR 500,000–1,000,000 monthly).

Realistic total client cost:

- Minimum compliance path (no agency sponsor): **IDR 7–11 million**
- Full-stack path (agency sponsor + monitoring): **IDR 9.5–14.5 million**

Processing time: approximately 5–10 working days end-to-end.

Service 3 — C5A Extension Pathway (60+60+60 = 180 days) — verified pattern

VERIFIED The extension pattern is **60 + 60 + 60 = 180 days total**, confirmed verbatim by NotebookLM NB-2 source: *"60 days (extendable to 180), perpanjangan 60 hari per siklus"*. Full Bali Zero advisory stack for the 180-day journey: IDR 12–17 million total, inclusive of compliance refresh sessions at months 2 and 4.

Service 4 — Alternative Visa Comparator + Switch

Decision-support service producing side-by-side cost, risk, duration, and restriction comparison for C5A versus E33G versus C2 versus KITAS PT PMA. Particularly relevant for creators earning above USD 60,000 per year (E33G qualified). Fee: IDR 2–3 million.

Service 5 — KITAS via PT PMA (Long-term Anchor)

For clients establishing Bali as a long-term creative base (12+ months/year, USD 80,000+ revenue, stable position): setup of PT PMA in the creative-media KBLI categories (e.g., 63122 hosting activities, 73100 advertising) followed by KITAS investor (E28A). First-year cost: IDR 25–40 million; recurring annual cost: IDR 10–15 million. Benefit: zero regulatory ambiguity, lawful Indonesian-origin income permitted.

Service 6 — Compliance Audit "Pre-Dharma Dewata"

Audit service for clients currently in Bali on tourist visa or C5A. Two-to-three-hour session: review of the previous six months of social posts (paid partnership flags, geotag patterns, hashtag history), review of barter relationships (hotel, villa, restaurant), recommendation of remediation steps. Fee: IDR 3–5 million.

Service 7 — Sponsor Procurement

OPINION Bali Zero or affiliated entities may act as institutional sponsors for C5A applications. Sponsorship must be authentic (not a shell arrangement). Subscription fee: IDR 500,000–1,000,000 per month.

UNVERIFIED The legality of "agency as sponsor" for content-creator activity is a grey area; local counsel review is recommended before scaling.

10. Appendix A — NotebookLM NB-2 Query Results

The following queries were executed against NotebookLM NB-2 (Immigration and Visa — Indonesia 2025, 108 sources at the time of query) on 2026-05-26. Verbatim responses are preserved with citation IDs to the underlying NB-2 sources.

Q-1 — PNPB exact for C5A

PARTIAL Source NB-2 spec sheet records "Contact for quote" for the index-specific fee. However, the PP 45/2024 Annex sets the base tariff for "Visa Kunjungan Paling Lama 60 Hari per orang" at IDR 1,000,000.

Visa Kunjungan Paling Lama 60 Hari per orang Rp 1.000.000,00

EN assist: Visit Visa with a maximum duration of 60 Days, per person, IDR 1,000,000.

Q-2 — Extension pattern

VERIFIED The C5A index permits an initial 60-day stay extendable to 180 days total, with extensions granted in 60-day cycles rather than 30-day cycles as for the Visa on Arrival.

Q-3 — Sponsor (agency as sponsor)

PARTIAL Pasal 19(1)(b) of Permenkumham 11/2024 lists the categories of single-entry Visit Visa applications that do not require a Penjamin (institutional guarantor), including the "kunjungan jurnalistik" (journalistic visit) category. The NB-2 deep research confirms that C5A does not require an Indonesian corporate sponsor as a statutory matter; Bali Zero sponsorship is a value-added service, not a regulatory requirement.

bukti penjaminan dari Penjamin, kecuali untuk kegiatan wisata, keluarga, meneruskan perjalanan ke negara lain, bisnis, mengikuti rapat, pembelian barang, melakukan kunjungan jurnalistik, dan prainvestasi

EN assist: proof of guarantorship from a Penjamin, except for activities of tourism, family, onward travel to other countries, business, attending meetings, purchase of goods, journalistic visits, and pre-investment.

Q-4 — UU 6/2011 Article 122(a) verbatim

NO DATA The full verbatim text of Articles 119, 121, 122(a), and 123 of UU 6/2011 (with the amendments introduced by UU 63/2024) is not present in the current NB-2 source corpus. The associated documents contain executive summaries only. Manual ingestion of the full gazette text from JDIH BPK is required to close this gap.

Q-5 — eVisa portal status

PARTIAL Pasal 19(1) of Permenkumham 11/2024 states that single-entry Visit Visa applications are submitted "melalui aplikasi" (via the application portal). C5A is therefore statutorily applicable via the eVisa portal. The operational status of the portal for C5A specifically (uptime, UX completeness) is not documented in NB-2; the page imigrasi.go.id/wna/daftar-visa-indonesia/C5A displays "Data Belum Tersedia" as of 26 May 2026.

Q-6 — Prohibited activities

PARTIAL Activities permitted: digital content creation, photography and videography, tourism, exploration. Activities prohibited: working for any Indonesian company or remunerated activity for any Indonesian entity; content violating Indonesian norms. Specific granular cases:

- Monetisation via YouTube, Instagram, TikTok from foreign platforms — **permitted**.
- Brand collaboration or sponsorship from Indonesian brands — **prohibited**.
- Barter arrangements (free accommodation in exchange for promotional content) — **not adjudicated** in current NB-2 sources.
- Paid fan-meetings — **not adjudicated** in current NB-2 sources.

Q-7 — C5 to C5A migration

VERIFIED Article II §1(c) of Permenkumham 11/2024 states that visas issued before the regulation becomes effective remain valid until their term expires. There is no automatic conversion from C5 to C5A. Holders of a valid C5 visa continue under that index until expiry; upon expiry, a new application for C5A is required if the activity profile fits the content-creator definition.

Visa yang telah diterbitkan sebelum Peraturan Menteri ini mulai berlaku, dinyatakan tetap berlaku sampai jangka waktu Visa berakhir

EN assist: Visas that have been issued before this Ministerial Regulation takes effect remain valid until the term of the Visa expires.

11. Appendix C — Primary-Source Verification

This appendix captures the primary-source verifications performed via direct HTTP fetch and document inspection on 2026-05-26.

imigrasi.go.id/wna/daftar-visa-indonesia/C5A

- HTTP status: 200
- Page title: "C5A Visa Kunjungan Konten Kreator"
- Substantive fields: **Data Belum Tersedia**
- Verified by: curl on 2026-05-26 from the dossier-author host.

imigrasi.go.id/biaya_imigrasi (Indonesian immigration fees)

Cross-verified the PNPB figures cited above. The official fees table lists Visit Permits at:

- 7 days: IDR 250,000
- 30 days: IDR 500,000
- **60 days: IDR 1,000,000**

- 90 days: IDR 1,500,000
- 180 days: IDR 2,000,000

Kepmen M.IP-08.GR.01.01 of 2025

The Kepmen document is ingested into the Bali Zero corpus as of 2026-05-26. NotebookLM NB-2 source ID: `0c7e2212-7925-452e-b239-86b627646352`. The Qdrant `legal_unified` collection now contains 94 chunks derived from the Kepmen, enabling hybrid (dense + BM25) retrieval against the document.

Permenkumham 11/2024

Article 19(1) and Article II §1(c) of the transitional provisions are cited verbatim in Appendix A. The full document is available in the public corpus at `peraturan.bpk.go.id/Details/375920`.

12. Open Questions and Unresolved Items

ID	QUESTION	STATUS	NEXT ACTION
OQ-1	Is there a C5A-specific PNPB surcharge above the IDR 1,000,000 base?	Partial — base verified, surcharge unknown	Direct Kantor Imigrasi Kelas I Denpasar inquiry
OQ-2	Is the extension pattern 60+60+60 = 180 days?	Closed — NB-2 source confirmed	None
OQ-3	Can an agency act as Benjamin for C5A?	Partial — sponsorship is optional under Pasal 19(1)(b)	Counsel review for "agency as sponsor" subscription model
OQ-4	Verbatim text of UU 6/2011 Articles 119, 121, 122(a), 123	No data in NB-2 — JDIH ingestion required	Manual download from <code>peraturan.bpk.go.id</code> and ingestion as NB-2 text source
OQ-5	Does the eVisa portal accept C5A self-service applications?	Partial — legally yes (Pasal 19), operationally unknown	Pilot application via portal
OQ-6	Are barter arrangements and paid fan-meetings prohibited under C5A?	No data — declined by NB-2	Counsel review and pilot test
OQ-7	Does C5 automatically convert to C5A?	Closed — no, transitional rule applies	None

13. Verdict and Verification Log

Verdict (factual, not promotional)

The C5A index is a legally established visa category for which the operational surface remains partly incomplete. The base PNBP tariff is verified at IDR 1,000,000 for the 60-day Visit Visa. The extension pattern to 180 days is verified. The migration rule from C5 to C5A operates by expiry rather than automatic conversion. The official imigrasi.go.id portal page for C5A continues to display `Data Belum Tersedia` as of 26 May 2026.

Bali Zero's advisory communication should rest on this verified baseline. Claims that go beyond the verified facts — including any specific C5A-only surcharge above the PNBP base, any specific procedural quirk that has not been confirmed by direct Kantor inquiry, and any informal adjudication of barter or paid-event arrangements — should be flagged as provisional in client-facing materials.

Verification log (this revision)

- NotebookLM NB-2 corpus queried on 2026-05-26 via three asynchronous queries (one deep research + two structured batches).
- imigrasi.go.id pages verified live via curl on 2026-05-26.
- PP 45/2024 Annex tariffs cross-referenced against the official fee schedule on imigrasi.go.id/biaya_imigrasi.
- Kepmen M.IP-08.GR.01.01 of 2025 ingested into NB-2 and into the Qdrant `legal_unified` collection on 2026-05-26.
