Defining the Opportunity: The Apartment Hotel (KBLI 55194)

This business category covers the provision of lodging services for the public by managing and operating apartments as hotels for temporary residence.

Key Concept Definition

Kelompok ini mencakup usaha penyediaan jasa pelayanan penginapan bagi umum yang mengelola dan memfungsikan apartemen sebagai hotel untuk tempat tinggal sementara, dengan perhitungan pembayaran sesuai ketentuan.

Examples:

Apartment Hotel, Condominium Hotel (Apartel/Condotel).

The Investment Landscape is Designed for Security and Control

LOW-RISK CATEGORY

The Indonesian government classifies KBLI 55194 under its 'Rendah' (Low) risk-based business licensing framework, simplifying entry and compliance.

100% FOREIGN OWNERSHIP

This sector is fully open to Foreign Investment (PMA), with a maximum allowance of 100% foreign capital. No local partner is required.

A Flexible Framework Supports All Scales of Business Operation

The KBLI 55194 regulation is structured to accommodate the **full spectrum of business sizes**, from individual ventures to large-scale enterprise developments.

The Path to Compliance is Clear and Well-Defined

To operate an Apartment Hotel under KBLI 55194, two key certifications are mandatory.

Sertifikat Laik Sehat (Health-Worthiness Certificate)

This ensures the property meets all required standards for health, hygiene, and sanitation.

Sertifikat Standar Usaha Pariwisata

This Tourism Business Standard Certificate, issued by a Tourism Certification Body (LSPrr), validates the quality of service and operational standards.

Clear Lines of Authority Govern the Permitting Process

The licensing authority is clearly designated based on the investment structure, ensuring a predictable application process.

The Key Accelerator: Automatic Approval via 'Fiktif Positif'

The single most powerful feature of the KBLI 55194 framework is its inclusion in the 'Fiktif Positif' (Positive Fictitious) mechanism.

What it means

If the relevant government authority does not issue a decision on a submitted application within a set timeframe, the application is **legally deemed to be automatically approved.**

The Impact

This eliminates administrative delays and provides investors with certainty and a significantly faster path to market.

This Streamlined Process is by Deliberate Design

The automatic approval mechanism is not an exception, but a core component of Indonesia's strategy to attract investment in specific, high-priority sectors.

KBLI 55194 is one of only 258 business classifications designated for this automatic approval process, highlighting its status as a prioritized investment area within the tourism sector.

A Clear Signal for Investment in Indonesian Tourism

The framework for Apartment Hotels (KBLI 55194) is more than a set of regulations; it is a clear, deliberate, and highly efficient pathway designed to attract and secure high-value investment in one of Asia's most dynamic tourism markets.
